GENERAL NOTE

Pipe lengths shown are calculated from theoretical dimensions. These lengths may vary slightly due to discrepancies in pipe length tolerances and field cutting equipment. Pipe in shipment is 20'-0" long. Pipe as shipped is not piece marked. After selecting a 20'-0" length for a particular cut, the field is to tag or otherwise mark the remainder of the piece with the length number as shown above. As successive cuts are made from this length the field is to maintain its identity by length number to assure that waste is as calculated.
