

	BP0403-SC026
	Version: 7.0
Low Density Polyethylene Plant (LDPE) HIP-Petrohemija d.o.o.	Identification number: TUS-HIPP-1348
	Date: 27/08/2024
<p align="center">SPECIFICATION OF THE INPUT MATERIAL</p> <p align="center">Lubricating oil for C-202 compressor cylinders</p>	

1. Product name/chemical name:	Lubricating oil for compressor cylinders: <i>Mineral oil of petroleum origin</i>				
2. SAP code:	8103410				
3. Technical description:	Lubricating oil for C-202 compressor cylinders Physical appearance: colourless liquid Flammability: flammable				
4. Physical and chemical characteristics:	Item number	Characteristic	Method	Unit	Range of allowed values
	1.	Density at 15 °C	SRPS EN ISO 3675	kg/m³	860-880
	2.	Viscosity at 40 °C	SRPS ISO 3104	mm²/s	200-240
	3.	Content of antioxidant A-15	-	ppm	2000-3000
5. Technical/accompanying documentation:	The Supplier is obliged to submit: - Safety data sheet , in Serbian - Test report - Data sheet on safety measures - Delivery note				
6. HSE requirements:	-				
7. Delivery and labelling:	The raw material is delivered by trucks, packed in metal barrels, weighing 200 kg. The following information must be clearly entered on each package unit: - Product name - Data on the manufacturer - Net mass of the package unit - Production date				

8. Transport:	-
9. Product eligibility criteria:	The raw material is acceptable if it meets the allowed tolerances in all aspects, or all the requirements given in this specification. The material is procured from the approved suppliers, who guarantee the quality. The Supplier receives the status "Approved" after a successful industrial trial run and laboratory tests.
